Modcol Multipacker and Spring® Columns

Easy self packing for 25, 50, 60, 70, 101 and 150 mm ID HPLC DAC columns

Multipackers

MultIPacker® packing station and Spring® columns can deliver improved performance, productivity, and safety. Unlike competitive systems, the column can be removed from the MultiPacker® packing station and the DAC (Dynamic Axial Compression) mechanism remains contained within the column.

Spring® Columns

The Spring® column system has a unique portable design with patented internal dynamic axial compression (DAC) technology that gives DAC performance independently from the external packing device. The columns are suitable for HPLC and SFC.

ReproKrom 100 C18, 10 µm

Vydac 218TP C18, 10-15 µm

ReproSil-Pur Basic C18, 10 µm

Ecoprep 60 Diol, 10 µm

Any Column, Any Size, Any Media

PREP-COLUMNS

ID: 8 - 200 mm
Length: 50 - 500 mm

PACKING SERVICE
REFILL
COLUMN TESTING – QC
HPLC – MPLC – LC
SFC
CHIRAL
COLUMN PACKING DEVICES

BULK MATERIAL IN DIFFERENT PARTICLE- AND PORE-SIZES
HUGE VARIETY OF MODIFICATIONS:
C30, C18, C8, PHENYL-HEXYL,
C4, C1, SAX, SCX, AMINO, CYANO,
HILIC, PEI, MIXED MODE,
AND MUCH MORE.

EXPERTS FOR PREPARATIVE LC / HPLC & SFC
COLUMNS - TECHNOLOGY:

The best solution for every area:
Refillable - Patented flow and distribution geometry - Certified

STANDARD THREADED
Simple - cheap - good
Threaded columns are very well suited for inner diameter ≤ 40 mm ID: 8 - 10 - 16 - 20 - 25 & 30 mm

STANDARD FLANGE
Simple - cheap - good
Flange columns are best suited for inner diameter ≥ 40 mm ID: 40 - 50 - 60 - 70 - 80 - 100 - 150 - 200 mm

FLANGE - MANUALLY ADJUSTABLE OR AUTOADJUST
Good value for money, good flexibility
Flange columns are best suited for inner diameter ≥ 40 mm ID: 40 - 50 - 60 - 70 - 80 - 100 - 150 - 200 mm

LONGLIFE (ALSO FOR SFC)
SAC - Static axial compression
DAC - Dynamic axial compression
Extremely high performance and life time
Available ID: 25 - 30 - 40 - 50 - 70 mm

ModCol® Spring®Column
(also for SFC)
DAC at it's best - Highest performance and life time.
Possibility of self-packing with "ModCol Multipacker"
Available ID: 25, 50, 70, 101 & 150 mm

HIGH PERFORMANCE PREP LC

ReproSil-Pur Basic C18, 3 µm – Up-Scale: 4.6 mm to 50 mm ID
Packed in LongLife hardware: same performance from 4.6 to 50 mm ID

STATIONARY PHASES:

Reprosil-Pur Basic C18 - Universe and low costs
Reprosil Gold 120 C18 - One of the best for peptides and oligonucleotides
Reprosil-Pur AQ 120 C18 - For proteins
Reprosil-XR 120 C18
Reprosil Gold 300 C4, C8, C18, Diphenyl - Chiral Bulk coated, immobile and brush type
Prospher 300 C4, C8, C18, Diphenyl - SFC (PEI, EP, ARG, Platinum EPS C8 & C18, Mixed Mode C18 WCX,...)

As we work without any additives, different column chemistries are needed to find the optimum resolution conditions.
Over the last 6 years several stationary phases have been tested on different classes of compounds (from acids to strongly basic compounds but also small linear and cyclic peptides). Two of those columns currently make up for 75% of successful separations.
